- Export option to download dashboard reports
- Bulk import option to upload fleet, driver and consumer reports from any supported file
- Option to view and manage ratings of each driver
- Option to view passenger details with the status of each passenger

Dispatcher Application

Dispatchers are now not restricted to managing work from one location. The Taximobility Dispatcher App empowers dispatchers to run their business from anywhere using their mobile device. The App is designed as compatible on all mobile and tablet devices for easy dispatching, assigning, tracking, reporting and more.

- Responsive and intuitive user interface design
- Refined filter and search capabilities based on vehicle/booking/driver status, vehicle model, location, driver name, driver availability, etc.
- Custom settings to edit and modify profiles, bookings and more
- Flexibility to select between auto and manual dispatch as per requirements
- Real-time booking notifications and transaction reports
- Advanced live tracking and automatic status updates
- Precise trip statistics, booking heatmaps and driver performance analytics

Driver Application

A dynamic driver application is all set to serve the best to its passengers over a tap. Upon activating GPS in the driver app, taxi companies can easily track taxi movements, assign and manage drivers in a more efficient manner.

- Login credentials for each driver
- Option to add referral code while signing up
- Mandatory requirement to activate GPS after logging in
- Go online/offline choice based on the availability to accept a ride request
- Provision to locate themselves in Google Maps
- Notifications to alert drivers of passenger requests
- GPS to locate passenger's pick up point and make the best route choice

- Notifications upon arrival at passenger pick up point
- Auto calculation of taxi fare and stopwatch to estimate the waiting time charges
- Unique trip ID for each trip
- Street pick-up feature to pick up passengers on the route eliminating the waiting time till another request
- Option to include street pick-ups in the working time/driving hours
- Wallet option to receive driver referral amount
- Option to send request for withdrawal of earned referral money and driver commission from the wallet
- Detailed report of daily income with graphical representation to manage earnings
- Summary of completed trips in statistics for future reference
- View ratings and manage profile with the assigned fleet details

Passenger Application

Passenger app is a front end app that lets passengers hire fleets from their preferred locations indicating the driver and vehicle of their choice. The application allows passengers to book, track and manage fleets over a few taps.

- White-label passenger application with customizable features
- Free to download application compatible on iOS and Android platforms
- Login using mobile number or through Facebook
